OBJECTIVES AND METHODS

The U.S. Army Environmental Center (AEC) tasked the Mandatory Center of Expertise for the Curation and Management of Archaeological Collections (MCX) with the job of assisting Army installation personnel in complying with the requirements of the Native American Graves Protection and Repatriation Act (P.L. 101-601, NAGPRA). The MCX was asked to locate and assess archaeological collections derived from Army-owned lands, to identify the federally recognized Native American tribes most likely culturally affiliated with the collections, to draft Section 6 Summary letters for each installation, and to conduct physical inventories of any collections that contain human skeletal remains. This report conveys the results of the collections research completed to assist Badger Army Ammunition Plant (Badger AAP) in complying with the Section 6 Summary requirements of NAGPRA.

The MCX used a two-stage process to identify, locate, and assess the contents of archaeological collections from the installation. First, archival research was performed to review all archaeological site records and reports for the installation. Second, telephone interviews were conducted with personnel at installations, universities, museums, and archaeological contractors that were identified during the archival research as possible repositories of Army collections. The MCX did not physically verify the existence of collections, and, as such the information contained in this report is based on background record reviews and information obtained via telephone interviews with the aforementioned installation personnel and institution professionals.

Archival research for Badger Army Ammunition Plant began with a search of the National Archeological Data Base (NADB) for references pertaining to the installation. This was followed by a thorough examination of all archaeological site forms and a literature review of all pertinent archaeological reports and manuscripts on file at the State Historical Society of Wisconsin, Division of Historic Preservation in Madison, Wisconsin. The records search was performed at the Division of Historical Preservation in September 1995 and sought to identify any work on the installation that may have produced archaeological collections.

Subsequent telephone interviews to potential collections repositories ascertained whether the materials were present and the range of objects in each collection. Once the collections were located and assessed, MCX personnel identified federally recognized Native American tribes that are likely to be culturally affiliated with the materials in the collections. Draft Section 6 Summary letters are enclosed for each of these tribes (Appendices I-III), as well as a listing of each current tribal chairperson (Appendix IV).

RESEARCH RESULTS

ARCHAEOLOGICAL INVESTIGATIONS AT BADGER ARMY AMMUNITION PLANT

Archaeological work on Badger AAP began in 1982 with a literature and records search followed by a cultural overview conducted by Archaeological Consulting and Services (ACS) of Madison, Wisconsin. ACS also performed a field survey in 1983 that recorded archaeological sites and collected artifacts from the surface of sites. The Center for American Archeology in Kampsville, Illinois, prepared an archaeological overview and management plan in 1984. Geo-Marine of Plano, Texas, is currently conducting another field survey.

Three historic Euroamerican cemeteries are located on Badger AAP property and have not been excavated. Prehistoric mounds are reported as having existed on or near Badger AAP property, but are noted to have been destroyed by cultivation.

SUMMARY OF ARCHAEOLOGICAL COLLECTIONS

A total of approximately one cubic foot of boxed archaeological materials and associated documentation has been identified for Badger AAP. Artifacts recovered include prehistoric flakes, a scraper, biface, and historic material. As of the date of this report, the collection is located at Archaeological Consulting and Services, Madison, Wisconsin and consists of prehistoric stone tools (a scraper, biface, and flakes) and historic material. The attached *Summary of Current Locations of Archaeological Collections from Badger Army Ammunition Plant* (Appendix V) provides detailed information about the collection derived as a result of archaeological investigations at the installation.

Every attempt has been made to locate all collections cited on available archaeological site records or in published and unpublished references to archaeological investigations on the installation.

NAGPRA-Related Materials

MCX research identified no human remains or funerary objects during its review of archeological records, associated literature, and telephone interviews for Badger AAP. The final

determination of any additional funerary objects, sacred objects or objects of cultural patrimony among the Badger AAP collections may be established upon further consultation with culturally affiliated Native American tribes according to the definitions and restrictions specified in NAGPRA.

REFERENCES TO ARCHAEOLOGICAL INVESTIGATIONS

Two sets of references regarding archaeological work conducted on Badger AAP are attached: Appendix VI contains the list of references reviewed by the MCX during its archival research; Appendix VII is the list of references contained in the National Archeological Data Base (NADB).

NATIVE AMERICAN TRIBES ASSOCIATED WITH BADGER ARMY AMMUNITION PLANT

According to the *Indian Land Areas Judicially Established 1978* map (U.S.G.S. n.d.), the area in central Wisconsin now occupied by Badger AAP is situated on land that was adjudicated to the Winnebago. The Menominee are shown on this map to have occupied land directly north of Badger AAP, but were not adjudicated this land. The Potawatomi were adjudicated lands to the southwest, and the Sac and Fox were adjudicated lands to the southeast of present-day Badger AAP.

The Winnebago were first encountered by Europeans in the area of present-day Green Bay, Wisconsin as early as 1634 by the French explorer Jean Nicolet, permanent contact was made after 1665 with the growing fur trade (Johnson 1992:32-33; Lurie 1978:690; Waldman 1988:250-251). "Winnebago" is an uncomplimentary Sac and Fox word that translates to "People of Dirty Water." Wisconsin Winnebago refer to themselves as Hochungra, meaning "People of the Big Voices," a name given to them by the Iowa Indians (Funmaker 1994:694-696). By 1840, many of the Winnebago were removed from their homeland in Wisconsin to the Neutral Ground in Iowa and to reservations in Minnesota and South Dakota. These Winnebago were relocated to Nebraska in 1865. In the 1880s, a portion of the tribe rejoined the fugitive Winnebago who remained in Wisconsin, creating two separate political and cultural groups, one in Nebraska and one in Wisconsin (Lurie 1978:697-700; Johnson 1992:33; Smith 1994:694).

The Menominee also first encountered French Europeans in the 1660s. At that time the Menominee inhabited the land in the Green Bay area along Lake Michigan and west into central Wisconsin. By the mid-nineteenth century, their homeland was reduced to reservation land in northern Wisconsin about 45 miles west of Green Bay. This reservation land was abundant in timber and the Menominee became one of the most self-sufficient tribes in the United States. It

is suggested that this success led to political strife, and eventually the Menominee Termination Act signed in 1954 and enacted in 1961. With this act came economic hardship to the Menominee community. Both Indian and non-Indian supporters of this community successfully lobbied to restore the Menominee, and in 1973 the Menominee Restoration Act was signed, reestablishing nearly all of the former reservation (Johnson 1992:32; Peroff 1994:329-330; Spindler 1978:718-723; Waldman 1985:194).

Johnson (1992:30-33) places the aboriginal home of the Potawatomi at the lower peninsula of Michigan. Around 1860 they were driven to the Door Peninsula near Green Bay, Wisconsin on the west shore of Lake Michigan. During the eighteenth century, they spread south to present day Milwaukee, Wisconsin. Those that did not move to Kansas in 1836 as a result of the 1833 Treaty of Chicago, lived in southern Wisconsin near Lake Geneva (Woods 1994). The Potawatomi retain a reservation in northern Wisconsin (Davis 1994:465).

The Sauk (or Sac), lived in the vicinity of Green Bay, Wisconsin, toward the end of the seventeenth century. The Fox, also known as the Mesquakie, lived along the Fox River before 1746, at which time, they were driven to the Wisconsin River. In the eighteenth century, a dispute with French traders led to a confederation between the Sac and the Fox. The two tribes joined, yet kept separate tribal identities (Johnson 1992:31-32; Grant 1994:563-564). The Sauk and Fox were removed to Iowa in 1804 and in 1861 they were again moved to Kansas. In 1869 they were removed to Indian territory in Oklahoma where they retain a reservation in Lincoln County (Grant 1994:563).

SECTION 6 COMPLIANCE

P.L. 101-601 (NAGPRA) requires that federal agencies engage in active consultation with Native Americans with federally recognized tribes and/or lineal descendants who may be culturally affiliated with the archaeological collections from the installation. Enclosed are draft NAGPRA Section 6 Summary letters (Appendices I-III) and a list of each tribal chairperson from the federally recognized tribes which may be culturally affiliated with the collections (Appendix IV).

Of the tribes referenced above, the Menominee, Potawatomi, Sac and Fox, and Winnebago are federally recognized.

Several groups have initiated the process to seek federal recognition. The Council for the Benefit of Colorado Winnebagos, Colorado has submitted a letter of intent to petition for federal recognition as of 26 January 1993 (Bureau of Indian Affairs 1995:7). Huron Potawatomi, Inc., Michigan has an active petition for federal recognition as of 27 July 1993, and a proposed positive finding was published 31 May 1995 (Bureau of Indian Affairs 1995:2). The Match-E-Be-Nash-She-Wish Band of Potawatomi Indians of Michigan petition for federal recognition was deemed ready for active consideration as of 28 April 1995 (Bureau of Indian Affairs 1995:2).

Initial consultation should be conducted on a government-to-government basis. Refer to P.L. 101-601 (NAGPRA) for specifics on required Native American consultation and the legal definitions of items subject to NAGPRA.

APPENDIX I

DRAFT SECTION 6 SUMMARY LETTER FOR THE WINNEBAGO

[Installation Header]

[Tribal POC Name]

[Title]

[Address]

[City, State, Zip]

Dear [Name of POC]:

I am writing to inform you of collections held by Badger Army Ammunition Plant that may contain Native American cultural items, as defined by the Native American Graves Protection and Repatriation Act (NAGPRA), that are, or are likely to be, culturally affiliated with the Winnebago. Badger Army Ammunition Plant has documented these archaeological collections in a summary in accordance with the requirements of Section 6 of NAGPRA.

Badger Army Ammunition Plant is responsible for collections that include approximately one cubic foot of artifacts and records housed at Archaeological Consulting and Service, Madison, WI. These archaeological collections were generated from surveys conducted from 1982 to the present. The collections consist of prehistoric flakes, a scraper, chipped stone tools, and a small amount of historical material, as well as associated documentation such as field notes, photographs, and correspondence. No human skeletal remains or associated funerary objects were identified in our review of the collections documentation.

We are notifying the Winnebago because some of these materials were found in the area thought to be part of the territory occupied or used aboriginally by the Winnebago. In accordance with Section 6 of NAGPRA, we are inviting you to consult with us regarding these archaeological collections. Upon your written request, we will provide you access to review our records, catalogues, relevant studies, or other pertinent data for the purpose of determining the geographic origin, cultural affiliation, and basic facts surrounding acquisition and accession of these collections.

Please feel free to contact [Installation POC name] regarding any of these issues, at [telephone, address].

To facilitate discussions between Badger Army Ammunition Plant and the Winnebago on these matters, please forward the name and method of contacting your tribal representative, traditional religious leader, or preferred NAGPRA point of contact. We look forward to working with you.

Sincerely,

[Commander's signature]

APPENDIX V

SUMMARY OF CURRENT LOCATIONS OF ARCHAEOLOGICAL COLLECTIONS FROM BADGER ARMY AMMUNITION PLANT, WISCONSIN

All collections information has been entered into a Paradox data base file and can be queried by any of the fields listed below, as well as by the name of the installation and by MACOM. The data base will be delivered by the MCX to the U.S. Army Environmental Center upon completion of the U.S. Army NAGPRA Compliance Project. Inquiries for additional information are welcome (MCX: 314-331-8865; U.S. Army Environmental Center NAGPRA Compliance Project: 410-671-1573). The data fields listed in the summary of collections contain the following information:

REPOSITORY:	The current location in which the collection is stored, as of the date of this report.
REPOSITORY POC:	The person contacted by the MCX, or the person to whom inquiries regarding the collection should be addressed.
TELEPHONE:	The telephone number for the repository POC.
COLLECTION ID:	The identifying unit used by the repository to store and/or locate the collection. This can be a unique accession number assigned by the repository, the archaeological site number or project name, the name of the collector of the collection, or another number or name assigned by the repository.
SITE NUMBERS:	The official site number or name only for those sites from which materials were collected. An investigator may have performed work at additional sites but did not collect any materials. Those site numbers are not included in this field.
FIELDWORK DATES:	The date(s) during which the investigation(s) occurred. This information is provided to differentiate between projects that may have investigated the same site repeatedly.
EXCAVATOR/COLLECTOR:	The individual and/or organization that conducted the investigation.

COLLECTION SIZE: The volume or number of objects in a collection, estimated by the repository POC or from project reports.

DESCRIPTION OF MATERIALS: General material classes of the objects in the collection derived from data provided on site records, in references, and/or by the Repository POC.

ANTIQUITY/ARCH. PERIOD: Chronological or cultural-historical designations recorded on site records or in references specific to the collection.

CULTURAL AFFILIATION: This column contains only those ethnic identifications found in the site records or references specific to the collection. This field is left blank if no such information was recorded.

BASIS OF DETERMINATION: Documents the source of the cultural affiliation information (e.g., site record, oral testimony, reference).

SECTION 5 MATERIALS: Describes the number and kind of human skeletal remains and associated funerary objects in the collection, as indicated by the site records, references, repository management documents, or information from repository POC. If these materials are present or are suspected to be present, NAGPRA Section 5 requires a physical inventory of the materials.

MCX LIST OF REFERENCES

In addition to the references reviewed by MCX personnel at the archaeological site information center, every attempt was made to obtain references cited but not on file. Information taken from these references was coded for data relating to collections made from sites located on installation property (see attached sample of PD-C Bibliographic Data Sheet form) and entered into a data base for ease of manipulation.

Report titles were drawn directly from the title page of reports, and consist of the following fields:

FIELD	DATA ENTERED
Subject Property	Army Installation name
Last Name	Primary author's last name
First Name	Primary author's first name
Middle Initial	Primary author's middle initial
Secondary Authors	Names of secondary authors, <i>or</i> in instances where the author is a company rather than an individual, the company name is listed here.
Title	Title of the reference. For letter reports, the person or agency to whom the correspondence is addressed is listed as the title.
Series	If the report is part of a publication series, the name and number are provided here.
Date	Date of publication or submission
Length	Report length in pages
Contract Number	Contract number and delivery order number, if applicable

The data for the next three fields are drawn directly from the report title page and reflect the hierarchy of contracting agencies involved in accomplishing the work. In some cases, the sponsoring agency is listed as the Army installation; in others, the intermediary contracting agent, (e.g., the Army Corps of Engineers or the National Park Service) is listed as the Sponsoring Agency.

Sponsoring Agency	Agency for which the report was prepared
Contractor	The agent contracted to perform the work
Subcontractor	The agent subcontracted to perform the work

The majority of the citations for archaeological investigations on Army land refer to unpublished reports prepared under contract with federal agencies, consequently the MCX printout was designed to address these reports. In instances where the author is a company rather than an individual, the company name is listed in the Secondary Authors field (due to the length of the field). For published references, the publisher is listed in the Sponsoring Agency field.
